Invitation to the International Symposium

The Gold Treasure of Ebreichsdorf

Prehistoric Gold Finds in the 2nd and 1st Millennium BC in Europe

August 18–20, 2023
Natural History Museum Vienna

Organising Institutions

Natural History Museum Vienna (NHM)
University of Vienna
Austrian Federal Monuments Authority (BDA)
Novetus GmbH

Supported by

Österreichische Bundesbahnen AG (ÖBB)
Austrian Society of Pre- and Early History (ÖGUF)

On August 18, 2023, the Late Bronze Age Gold Treasure from Ebreichsdorf, Lower Austria, discovered in 2019/2020, will be officially gifted to the Natural History Museum in Vienna and thus made permanently accessible to the public. In order to place the prehistoric gold finds from Ebreichsdorf into a wider context, contributions by international expert colleagues have been invited to shed light on the distribution, use and manufacture of gold artefacts of the 2nd and 1st millennium BC in Europe in a symposium on August 18–20, 2023.

The research results of an international and interdisciplinary team of experts, which has been investigating numerous aspects of the production, processing, cultural significance and origin of the Gold Treasure from Ebreichsdorf since 2020, will also be presented for the first time at the symposium. On August 18, 2023, the ÖBB-Infrastruktur AG (ÖBB) will celebrate the donation of the Gold Treasure from Ebreichsdorf to the Natural History Museum Vienna. The ceremony will further include the presentation of a book on the Ebreichsdorf Gold Treasure.

Ahead of the symposium, the Austrian Federal Monuments Authority hosts their annual expert round table on the topic "*Finds – Reports – Treasures. Archaeological preservation of monuments in the pandemic years*" at Mauerbach, Lower Austria, on Thursday, 17th August 2023. Contact for the expert talk: eva.steigberger@bda.gv.at
